SECURE VIDEO CONSULTATIONS

Challenging times have caused a shift in the way that medical professionals consult with patients. As more and more provinces move towards telehealth and integrated digital billing codes, there is a need for a secure, PHIPA and PIPEDA compliant video platform for healthcare professionals.

drCalls is a **FREE** secure video consultation platform designed for the medical profession; offering 2048-bit encrypted one-to-one video conference and chat functionality in private sessions, protecting you and your patient.

Features include provincial health insurance billing, appointment scheduling and file uploads to make this an essential tool to manage digital consultations. Direct integration into Verified Medical allows for long-term storage, secure sharing and collaboration with other healthcare providers for home-care and ongoing management.

PHIPA, PIPEDA & HIPAA Compliant
Direct Doctor to Patient or
Doctor to Doctor
Integrated Billing
Appointment Scheduling
Secure File Sharing
Document Storage & Retrieval
Save Video & Audio Sessions
No Account Necessary
No Software Downloads
Integrated with Verified Medical*
