

HOW VERIFIED MEDICAL BENEFITS SPECIALIST PRACTITIONERS

PATIENT CARE

Doctor/Specialist Referrals
Receive referrals direct from GP's using real-time, secure messaging.

Improve Diagnosis
Faster patient diagnosis with images and description. Monitor conditions over time with images.

Reduce Patient Waitlist
Triage patient waitlists, prioritizing urgent cases and reduce unnecessary appointments.

SECURITY

Secure transfer of images
Send images and data securely rather than using email.

Encrypted Data
Your images and data are encrypted to maintain privacy and build trust.

A Secure Network of Professionals
Share and collaborate with a secure network of healthcare professionals and trusted advisors.

REVENUE

Collect missed referrals
Ability to generate paid referrals that were previously missed and unbilled.

Collaborate with Physicians
Two-way consultation with Verified is billable under Telemedicine billing codes.

Collaborate with your Patient
Send and receive images with your patient and bill under new Telemedicine codes*.

* October 2017

Facilitate billing of digital consultation between family practitioners and specialist.

Improved patient care with better patient records including images to document ailments, recovery and the whole referral process.

Triage your wait list with prioritization for patients in most need.

Capture images pre and post surgery and link to your patient EMR.

Create a visual history of images throughout the recovery process.

Verified is an adjunct to your EMR with secure and private cloud storage
